JANCO'S FIRST ESHOP NOW OPENS FOR BUSINESS

Janco always values progressive and innovative ideas. As one of our key business members, Janco E-commerce Solutions Ltd has been seeking new opportunities by leveraging resources and capabilities developed over the years. Our colleagues are working around the clock to introduce new online shopping experience to all customers. Their efforts now pay off with the launch of Jgadget4u, Janco's first eshop, on the top 2 local e-commerce marketplaces in France, PriceMinister and FNAC.

Jgadget4u is currently providing customers with high quality consumer electronics including smart devices and professional cameras. We expect to break into the headphones and related accessories market this year. In the foreseeable future, product lines will be further expanded by the inclusion of cosmetic and garment products.

Janco E-commerce Solutions is also bringing Jgadget4u to multiple platforms, including the world-renowned online marketplace, eBay. Experience gained from operating on these platforms will pave the way for the official website of Jgadget4u, currently targeting to launch in mid-July.

Janco E-commerce Solutions Ltd is a member of Janco Holdings Ltd, an one-stop logistics service provider based in Hong Kong. It is established to provide customized logistics solutions for e-merchants with varying needs and to develop Janco's online trading capabilities.
