

Janco Pharma Obtained ISO 9001 Qualification

28/8/2018

Following the professional qualifications of GMP (Good Manufacturing Practices), GDP (Good Distribution Practices) and numerous licences issued by Drug Office of Hong Kong Department of Health (e.g. Wholesales Dealer License, Anti-biotics Permit, etc.), Janco Pharma has been granted the ISO 9001 in this August.

The qualification of ISO 9001 is a milestone of our development, certifying the high-quality management, training and auditing practices implemented on warehousing and logistics services for medicinal products.

Janco Pharma acquired several professional-grade facilities and equipment to fulfil the special need of logistics services for pharmaceutical products such as temperature-controlled warehouse and refrigerated trucks. Apart from warehousing and transportation, we also provide value-added services such as inventory management, secondary packaging and agency services for import and export of pharmaceutical products.
