

Janco Operates New Hong Kong – Nanchang Cargo

Freighter with SF Airlines

2019/03/06

After the great success in the Nanning – Dhaka Cargo Freighter Project, Janco co-operate with SF Airlines again on a new Hong Kong – Nanchang Cargo Freighter Project. Recently, both parties have entered into an agreement and confirmed B737 aircraft in freighter configuration (max. 15 tons payload) will be used, and the route will operate 5 times per week. As a city located in East and Central China, the freighter can also serve surrounding cities such as Chongqing, Wuhan, Changsha, Chengdu, Ningbo, Shanghai and also other provinces and cities in China with minimal transportation cost.

As one of the pilot cities in the development plan of China in inbound cross-border e-commerce business, Nanchang will be in great demand of international cargo freighter traffic to support its development. Our latest cargo freighter will be a perfect match for the opportunity in their e-commerce business development plan. Besides, the cargo freighter can also help to handle our air-sea intermodal shipments and offer a cost-efficient solution to our clients.

Flight No.	Aircraft	Day	Origin	Departure	Arrival	Destination
037163	B737	12345	Nanchang	21:40	23:20	Hong Kong
037164		23456	Hong Kong	08:25	09:40	Nanchang
