

Janco Jointly Organized the Hong Kong Investment Conference with Pinduoduo

30/05/2019

Janco E-commerce team co-operated with Pinduoduo in organizing their Hong Kong Investment Conference on 24 May. Pinduoduo first introduced their platform and “Social-networking E-commerce” ideology to the potential investors. Next, Janco logistics team also introduced their logistics facilities and operations to the audiences. Right after the conference, Janco arranged shuttle buses for all of the audiences to the flagship warehouse in Lau Fau Shan and provided a guided tour there in order to strengthen their understanding on the logistics and drop shipping operations of Janco.

Pinduoduo established in September 2015, and successfully listed on NASDAQ in USA within 3 years from establishment. The development of Pinduoduo is the fastest among all E-commerce platforms in China, which daily number of orders received is ranked the top 3 among E-commerce platforms in China now. Their “Social-networking E-commerce” business model encourages users to group up and place orders together in order to drive the selling price and logistics cost lower,

which brought a whole new online shopping experience to the users and such ideology eventually boosted the development of the platform.

With the contribution and participation from Pinduoduo and merchants, the Hong Kong Investment Conference is a huge success. Janco hopes to engage in the business with Pinduoduo and its merchants soon by providing high standard logistics, warehousing, pick-and-pack and delivery services at high quality and create more value to all parties.
