

Janco Diversify Service Scope and Begin Providing E-Commerce Finance Service

16/10/2019

With the strong upward trend of e-Commerce business noticed in not only China and Hong Kong market but also foreign markets, Janco follows the trend and executed the new development plan on e-Commerce business. Apart from existing storage, pick and pack, freight forwarding and delivery services, Janco expands its services to upstream sellers and provides e-Commerce finance service.

E-Commerce finance service aims to relief financial pressure of e-shop owners in procurement and logistics operations. In return, lenders usually take the inventory bought as collateral and designate a logistics service provider for borrowers to minimize the default risk.

Janco anticipates the new e-Commerce finance service can bring new challenges and provide chances of development to the e-Commerce team through the synergy between the new and the existing downstream services.

Warning: You have to repay your loans. Don't pay any intermediaries.
