

JANCO GROUP
駿高集團

WHO WE ARE

Janco Global Logistics Limited has over 30 years of logistics experience globally. We specialize in various areas, including global forwarding, contract logistics, e-commerce solutions, warehousing, pharmaceutical & healthcare, and express services. Investing in cold chain facilities and implementing AI technology into our supply chain system is also part of our significant achievements. Besides offering our services simultaneously, we always remember to propel environmental sustainability and society contribution as a motivation to foster the next generation.

Global Forwarding

E-commerce Solutions

Inventory Management

Robotic Fulfillment

Last Mile Solutions

Express Services

GLOBAL FORWARDING

From door-to-door freight services, warehousing and distribution to integrated services, we can cater to your needs with a seamless, centralized, one-stop solution at all levels.

OPTIMIZING TRANSPORT ROUTES

AI technology helps reduce fuel consumption, avoid traffic congestion, and analyze existing routing with the shortest route optimization algorithms, thus saving costs.

PHARMACEUTICAL & HEALTHCARE

We secure your medication under our cold chain facilities, utilizing a temperature-controlled system with a multilayer cooling bag to achieve the highest protection.

ENERGY SAVING

By incorporating motion sensor LED light bulbs, the action enables us to decrease energy consumption while maintaining high levels of productivity and performance.

EXPRESS SERVICES

Working with professionals from around the globe, our wide range of door-to-door express services and domestic distribution can take care of your operational demands.

LIGHTER EMISSION VEHICLES

Over the years, Janco has deployed vehicles with lighter emissions to improve roadside quality and work closely with the government to minimize pollution risk.

CONTRACT LOGISTICS

By implementing technologies and comprehensive strategies, Janco delivers a complete end-to-end supply chain solution to help customers streamline operational procedures and minimize costs.

E-COMMERCE SOLUTIONS

To cope with the evolving shopping experience, Janco Group delivers a seamless integration system to handle B2B/B2C e-commerce and crowdfunding fulfillment and cross-border delivery.

ELECTRIC FORKLIFT

Replacing electric forklifts with carbon-fueled variants can produce fewer emissions, predominantly with no exhaust fumes or other toxic gases.

SOLAR PANEL

The solar panel is essential in helping our warehouse reduce greenhouse gas emissions, generating renewable energy, and a great way to combat global warming.

ECO-FRIENDLY PACKAGING

Janco sources natural fiber and eco-friendly materials that can be recycled, continually initiating to reduce carbon footprint.
